PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in Java full-stack development through an internship and personal projects. I've worked with Angular, Spring Boot, REST APIs, databases, and authentication, and also built a Python-based AI customer support agent using a locally hosted LLM. I enjoy solving problems, building practical applications, and learning new technologies when a project requires them.

WORK EXPERIENCE

Frontend Developer — **Remote**

Tann Mann Foundation, Internship — *June 2026 - Sep 2026*

- Contributing to Zimuital, an Angular-based AI-powered platform, developing user-facing functionality for analyzing customer body measurements and clothing sizes.
- Developed 10+ reusable Angular standalone components, reducing duplicate UI code by 30%.
- Built reactive UIs using RxJS and Angular Signals for efficient asynchronous data and state management.
- Integrated REST APIs using Angular HttpClient with JWT authentication, HTTP interceptors, and centralized error handling.

PROJECTS

AgileFlow — Project Management System — **Github**

Angular 20, TypeScript, Java 17, Spring Boot 3.x, Spring Security, JWT, MySQL — *June 2026 — Aug 2026*

- Built a full-stack Jira-inspired platform supporting authentication, RBAC, sprint planning, issue tracking, worklogs, notifications, and reporting.
- Developed 15+ REST API endpoints covering authentication, users, projects, sprints, issues, worklogs, notifications, and reporting.
- Implemented RBAC across 25+ protected features/endpoints using Spring Security and JWT.
- Built 40+ reusable Angular components to maintain consistent UI and reduce duplicate frontend code.
- Used ChatGPT for API scaffolding, debugging, code review, and technical documentation.

AmazonHelp — Customer Support AI Agent — **Github**

Python 3.10.x, Ollama, Qwen2.5 1.5B, Sentence Transformers, RAG, LLM — *Sep 2026 — Present*

- Built an AI-powered customer support agent to classify customer queries into support intents and generate appropriate responses.
- Processed and prepared customer-support conversation data for intent classification and evaluation.
- Integrated a locally hosted LLM using Ollama for natural-language intent classification.
- Developed an evaluation workflow to measure intent classification performance against a curated dataset.
- Used Claude, ChatGPT for code generation, debugging, API design, and documentation.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT

Frontend: Angular, HTML5, CSS3, Tailwind CSS, SCSS

Databases: MySQL, DBMS, Database Design

Software Development: Object-Oriented Programming, Data Structures & Algorithms, Software Design, Debugging

IDE's: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

EDUCATION

Mass College Of Arts & Science — **Kumbakonam, Tamilnadu, India**

Master Of Computer Applications — *June 2024 — June 2026*

ACHIEVEMENTS

National Level Technical Meet (Itrix 2k25) — 1st Place — **Certification**

Organized by Annai College of Arts & Science — *Feb 2025*

LeetCode — 200+ Problems Solved

Solved 200+ problems on LeetCode, strengthening programming and problem-solving skills.
