PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience in Java, Spring Boot, Angular, REST APIs, Spring Security, JWT, and MySQL. Experienced in building maintainable web applications, secure API integrations, database-driven features, and reusable frontend components. Strong foundation in OOP, DSA, SQL, database design, and software development practices.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL

Frameworks: Angular, Spring Boot, Spring Security, Spring Data JPA, Hibernate, JWT, REST APIs

UI and Layout: HTML5, CSS3, Tailwind CSS, Bootstrap CSS, SCSS

Databases: MySQL

Cloud: AWS

CS Fundamentals: Operating System, Computer Networks, Object Oriented Programming, DBMS, Microservices (Theoretical Knowledge)

WORK EXPERIENCE

Frontend Developer

Remote

Tann Mann Foundation, InternShip

June 2026 - Sep 2026

- Contributing to Zimutail, an Angular-based AI-powered fashion platform that analyzes customer body measurements against clothing sizes to improve size selection and reduce size-related order cancellations.
- Developed 10+ reusable Angular standalone components, reducing duplicate UI code by 30%.
- Built reactive UIs using RxJS and Angular Signals for efficient asynchronous data and state management.
- Integrated REST APIs using Angular HttpClient with JWT authentication, HTTP interceptors, and centralized error handling.

PROJECTS

AgileFlow — Project Management System

[Github Link](#)

Angular 20, TypeScript, Java 17, Spring Boot 3.x, Spring Security, JWT, MySQL

June 2026 — Aug 2026

- Built a full-stack Jira-inspired platform supporting authentication, RBAC, sprint planning, issue tracking, worklogs, notifications, and reporting.
- Developed 15+ REST API endpoints covering authentication, users, projects, sprints, issues, worklogs, notifications, and reporting.
- Implemented RBAC across 25+ protected features/endpoints using Spring Security and JWT.
- Built 40+ reusable Angular components to maintain consistent UI and reduce duplicate frontend code.
- Used Claude, GitHub Copilot, and ChatGPT for API scaffolding, debugging, code review, and technical documentation.

AmazonHelp — Customer Support AI Agent

[Github Link](#)

Python 3.10.x, Ollama, Qwen2.5 1.5B, Sentence Transformers, RAG, LLM

Sep 2026 — Present

- Built an AI customer support agent using Python, Qwen2.5 1.5B, Ollama, and Sentence Transformers over 124K+ English customer-agent pairs from the 3M+ TWCS dataset.
- Implemented a 7-intent hybrid classifier and semantic retrieval using 384D embeddings, retrieving top-3 historical resolutions for grounded LLM response generation.
- Developed confidence-based escalation with a 0.60 similarity threshold and evaluated the system using a 200-case golden set (150 reference + 50 held-out), including analysis of 25 classification failures.
- Implemented JWT authentication and RBAC for secure access across 10+ protected endpoints.
- Used Claude, GitHub Copilot, ChatGPT, and Gemini for code generation, debugging, API design, and documentation.

EDUCATION

Mass College Of Arts & Science

Kumbakonam, Tamilnadu, India

Master Of Computer Applications

June 2024 — June 2026

CERTIFICATIONS

Responsive Web Design (FreeCodeCamp): Practical knowledge of responsive web design

Introduction to Artificial Intelligence (Infosys SpringBoard): Basics of AI, ML, and LLM

Prompt Engineering (Infosys SpringBoard): Effective AI communication techniques
